Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The rejection of claims 19-34 and 36-38 under 35 U.S.C. 103(a) as unpatentable over Shabram *et al.* (WO 96/27677 A2, "Shabram") in view of Berg (WO 98/33572 A1), Bondoc *et al.* (*J. Indust. Micro. & Biotech.*, 1998, "Bondoc") and Georgiou *et al.* (US 6,027,888, "Georgiou") is withdrawn because Shabram generally teaches an anion exchange chromatography step, providing only specific examples using conventional DEAE column chromatography. Shabram does not teach or fairly suggest particles of adsorbent comprising an agarose matrix and a central core comprising quartz, and dextran chains covalently coupled to said agarose matrix, on which are attached positively charged groups. There is no motivation in the other references of record to modify Shabram's method with the instantly claimed adsorbent particles having the claimed components to result in the instantly claimed method. Therefore, the rejection is withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Claims 19-34 and 36-38 are allowable.
